ECHP USER GUIDE

November 28 2005

This user guide has been produced by the EPUNet Team, a consortium of six research institutes from Denmark, Germany, Ireland, the Netherlands, Italy and the UK. Representatives of these institutes form the Steering Group of the EuroPanel Network. It is co-ordinated by the Institute for Social and Economic Research at the University of Essex.

1. Introduction

Purpose of this guide

The purpose of this basic user guide is to provide a straightforward presentation of the European Community Household Panel (ECHP) dataset for new users and to provide a reference to more detailed information for experienced users. The guide is intended to give the new user sufficient information to begin working with the ECHP data. For more experienced users, the guide provides, in a compact format, references to the appropriate Eurostat documentation dealing with key data issues.

Overview of the ECHP

The ECHP is a harmonised cross-national longitudinal survey focusing on household income and living conditions. It also includes items on health, education, housing, migration, demographics and employment characteristics.

The survey runs from 1994 to 2001. In the first wave (1994) a sample of some 60,500 households i.e. approximately 130,000 adults aged 16 years and over were interviewed across 12 member states (Belgium, Denmark, Germany, Greece, Spain, France, Italy, Ireland, Luxembourg, The Netherlands, Portugal, the United Kingdom). In wave 2 (1995) Austria, then Finland in wave 3 (1996) joined the ECHP. From Wave 4 (1997) Sweden provides cross-sectional data in the UDB format derived from its National Survey on Living conditions.

For most of the countries the surveys were carried out using the harmonised ECHP questionnaire. For some countries the institutes in charge of the production of the ECHP converted national data surveys into ECHP format to replace the ECHP from 1997 onwards. In Germany and the United Kingdom, the derived national data was provided from 1994 to 2001. The details of these variations across countries and national surveys are given in Table 1. Care is needed in analysing the converted data for these countries, as some information might not have been collected in the national surveys so that they will appear as missing in the ECHP. In other cases, variables that were not collected in the national survey were imputed based on similar variables.

Table 1: Nature of ECHP data by country and year (Harmonised original ECHP data and data derived from existing national sources)

Countries	Full ECHP Data Format	ECHP Data Format derived from National Surveys
Belgium*, Denmark, France, Greece, Ireland, Italy, the Netherlands*, Spain, Portugal	1994-2001	-
Austria	1995-2001	-
Finland	1996-2001	-
Germany	1994-1996	1994-2001 (SOEP)
Luxembourg	1994-1996	1995-2001 (PSELL)
United Kingdom	1994-1996	1994-2001 (BHPS)
Sweden	-	1997-2001 (SLCS) (Cross-sectional data only)

* The ECHP data for Belgium and the Netherlands come from a modification of existing national panels to meet the ECHP requirements. These are listed in the first column above because this system was in place from the beginning of the ECHP and national questionnaires were substantially modified to meet the ECHP requirements.

From the Production Data Base to the User Data Base

Within each country represented in the ECHP the surveys were carried out by the “National Data Collection Units”, “NDUs” that are either the National Statistical Institutes or research centres. The results of the interviews were then transmitted to Eurostat using a format very close to the questionnaire. These datasets were checked and formatted by Eurostat as the ‘Production Data Base’ (PDB). The PDB which is only available to the “NDU’s” is then used by Eurostat for weighting, imputation and construction of the ‘User Data Base’ (UDB). The UDB is the standardised, anonymised and more user-friendly user version of the ECHP data made available to researchers under an ECHP research contract signed with Eurostat.

Characteristics of the ECHP dataset

Three central features of the ECHP make this dataset a valuable source of information for researchers.

The first feature is the multidimensional character of the topics covered. The ECHP provides microdata on a wide range of topics at the level of individual and household:

income, social life, housing condition, health, education, employment, training, and so on.

The second feature is the cross-national comparability of the data. The ECHP (apart from those countries using data derived from national sources, as noted above) is a harmonised and comparable dataset across countries. This has been achieved through the implementation of common procedures at all stages from the design of a harmonised questionnaire, harmonised definitions and sampling requirements.

The third and final main feature of the ECHP is its longitudinal nature. Individuals who were members of a household in the first wave ('sample persons') are followed over time allowing researchers to examine how their circumstances change over time. As such, the ECHP provides information on relationships and transitions over time at the micro level.

Data access

The ECHP dataset is available through one of the Eurostat Datashops. Contact details for the Datashops and further information regarding access to the data can be found on the following web site:

<http://europa.eu.int/comm/eurostat/Public/datashop/print-catalogue/EN?catalogue=Eurostat>

Eurostat distributes the dataset via a CD-ROM that includes the documentation of the ECHP UDB as well as a self-extracting file to produce the dataset. Eurostat supplies the dataset files in a "comma separated variable" (CSV) format. A file in CSV format is a plain text file where all values (text, numbers...) are separated by commas and, in the case of string (alpha) variables, enclosed with double quotes. Because they are not application-specific, CSV files can be opened on any computer system and by most applications.

However, the files will have to be converted into a readable format before the data can be analysed using statistical packages such as SAS, STATA or SPSS. Some [transcription programs](#) are available online for this purpose on the EPUNet website.

2. Documentation

Eurostat has prepared a number of documents providing details about the content and character of the ECHP data files, and background on survey methodology. The key documents are sent to users who obtain the data on CD ROM on the CD itself. They are also available on the [CIRCA](#) library web site page dedicated to ECHP. Because of the large number of these documents we can't fully describe all of them here but Figure 1 outlines the structure of the CIRCA website in order to facilitate a search for a specific document. In addition, Annex A provides a comprehensive list of all documents available on this website following the same structure as on the CIRCA web site.

Figure 1: Organisation of the CIRCA web site on ECHP documentation

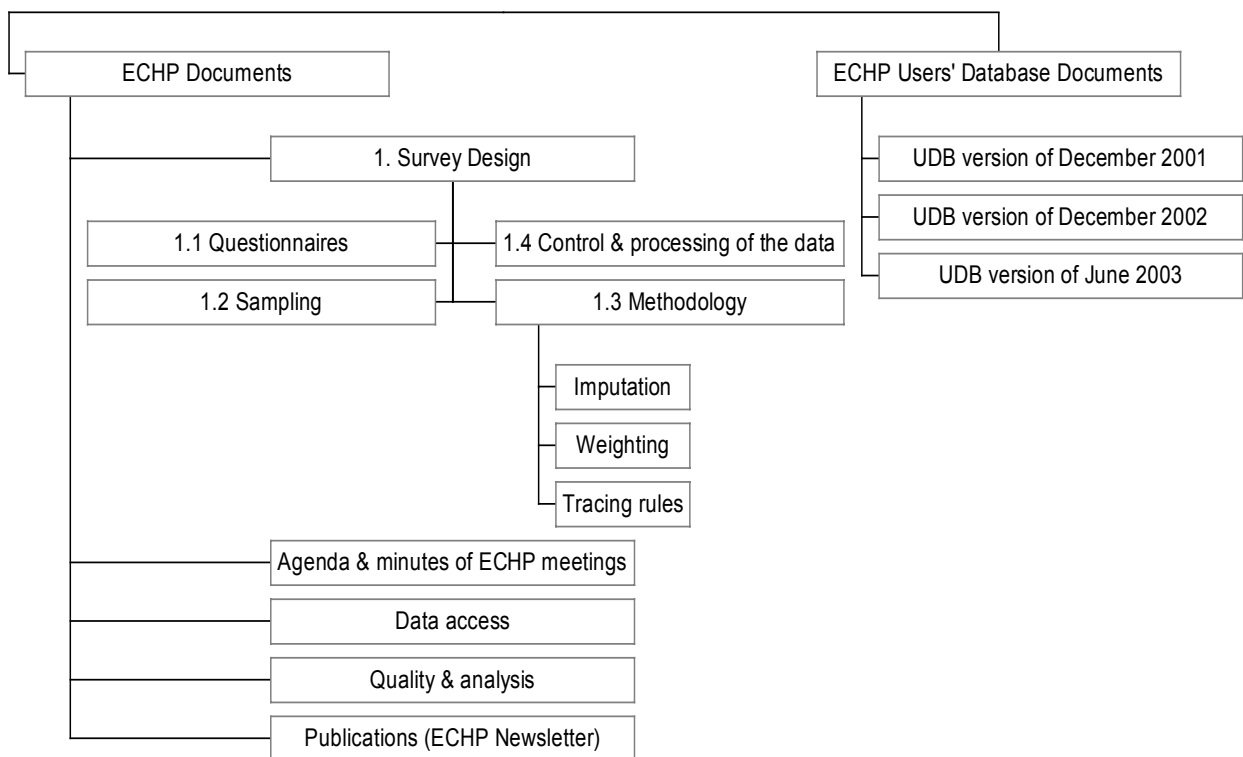

Table 2 lists some of the key documents which are likely to be of use to users and analysts of the ECHP.

Table 2: Key ECHP documentation

Document name	Description of the content
PAN 15	The variable list and codebook for the household and personal register records as well as for the household and personal questionnaire records for Wave 1 (1994).
PAN 30	As above but for wave 2 (1995)
PAN 65	As above but for wave 3 (1996)
PAN 81	As above but for wave 4 (1997)
PAN 97	As above but for wave 5 (1998)
PAN 112	As above but for wave 6 (1999)
PAN 151	As above but for wave 7 (2000)
PAN 159	As above but for wave 8 (2001)
PAN 165	Describes the weighting procedure that has been implemented for calculating individuals and households weights without describing however how these weights have to be used
PAN 166	Describes the variables (data dictionary, code book, and differences between countries and waves). The document is divided between the Household file and the Personal file, themselves divided into categories such as General Information, Demographic, Income and so on.
PAN 167	Describes the conversion of the variables from the PDB questions to the UDB variable format for the household file, personal file as well as link fixed variables and link wave specific variables (household and personal)
PAN 168	Presents the ECHP history as well as describing the dataset (the various files), the contractual arrangements and the related documents (Doc PAN 164, PAN 165 etc...) and the contacts for the National Data Collection Units and Eurostat

3. Structure of the ECHP User Database

This section provides an outline of the content of the ECHP User Database (UDB) files, as covered in more detail in the document PAN168. The UDB includes several files that

are wave-specific (a “register file” a “relationship file”, a “household file” and finally a “personal file”) and two files cover all the waves (the “country file” and the “longitudinal link file”). Annex B provides a list of the variables included in each file.

[3.1 Country File](#)

This file contains the following information for each wave and country:

- Population figures (number of private households, number of persons living in private households, number of persons aged at least sixteen and living in private households) which can be used to rescale the weight to gross-up the results to population figures.
- Purchasing power parities (PPP): PPPs are a fictitious currency exchange rate, which eliminate the impact of price level differences; 1 PPP will thus buy a comparable basket of goods and services in each country (they are scaled at EU level, which is why PPPs can be thought of as the Euro in real terms).
- Exchange rates figures to convert national currencies to ECU/EURO. The country file contains also the fixed exchange rates for the ‘Eurozone’ countries (after 01.01.1999).

[3.2 Longitudinal Link File](#)

This file contains a record for every person that ever appeared in the ECHP. The first section contains information (gender, year of birth...) that remains constant over time. The second section, which is repeated in each wave, contains all the information (household identifier, household size...) required to rebuild the “longitudinal status” of the person from the beginning to the end of the panel, derived from the personal and household register files. Each person receives an identification number (PID) that is fixed across all waves. Note that the PID is unique only within country: when several countries are being analysed, the country code must also be used to create a truly ‘unique’ identifier.

[3.3 Register File](#)

This file covers all persons currently living in households with a completed household interview. There is one register file for each wave of data. Principally the information available for each person is the household and personal identifier, the weights, year and month of birth, age and gender.

[3.4 Household File](#)

This file contains one record for each household with a completed household interview.

The data in the household file is grouped into 7 sections as follows:

- HG: General information
- HD: Demographic information
- HI: Household income
- HF: Household financial situation
- HA: Accommodation
- HB: Durables
- HL: Children.

[3.5 Personal File](#)

This file contains one record for each adult with a completed personal interview. The information is grouped into 13 sections as followed:

- PG: General information
- PD: Demographic information
- PE: Employment
- PU: Unemployment
- PS: Search for a job
- PJ: Previous job
- PC: Calendar of activities
- PI: Income
- PT: Training and Education
- PH: Health
- PR: Social relations
- PM: Migration
- PK: Satisfaction with various aspects of life

[3.6 Relationship File](#)

This file records the relationship between each pair of persons in the same household. There is a separate relationship file for each wave. Its records have the format "person X has relationship R with person Y". The following rule is used in specifying the variables corresponding to X, and Y:

If the relationship is between an ascendant and a descendant (such as parent and child), 'R' (variable 'Relation') always specifies the descendant side of the relationship (e.g. the

child, grandchild etc.). Variable PID1 is the fixed identification number (PID) of the ascendant, and variable PID2 is the fixed identification number (PID) of the descendant.

In the relationship file individuals are identified in terms of their fixed PIDs, so that the consistency and evolution of relationships can be traced over waves.

3.7 Variables Used for Matching Files

The following diagram shows how the UDB files are linked in terms of the identifiers or ID numbers. It shows, for example, that in order to ‘attach’ information on the household file to a particular individual, you would need to match the household file to the personal file using Wave, Country and HID.

Figure 2: Examples of Identifiers Used in Linking Files

3.8 Number of observations in each file and wave

The following table gives an indication of the number of cases available for cross-sectional analysis in each wave. It shows the number of cases in each of the UDB data files.

Table 3: Number of observations in each file and wave

	Link File	Household	Register	Personal
Wave 1	N.A.	71,367	198,070	149,306
Wave 2	N.A.	73,715	204,060	156,063
Wave 3	N.A.	74,746	205,432	157,536
Wave 4	N.A.	68,788	186,987	143,935
Wave 5	N.A.	66,097	177,434	136,238
Wave 6	N.A.	64,285	171,093	131,372
Wave 7	N.A.	61,330	161,735	124,937
Wave 8	N.A.	59,852	156,606	121,122
All waves	282,615	N.A.	N.A.	N.A.

Note: Data files for Waves 1-3 include the data from national sources for Germany and the UK, as well as the data from the original ECHP. Data from Waves 2-3 include data from the national source for Luxembourg as well as the ECHP data for Luxembourg.

3.9 Number of cases available for Longitudinal Analysis

The following table gives an indication of the number of cases available longitudinal analysis. It shows the number of cases for which information is available in all of the indicated waves¹. It is clear that sample attrition has reduced the number of cases available for longitudinal analysis. For more information, see *Doc. PAN118 Sample attrition between Waves 1 and 2 in the ECHP*.

Table 4: Number of cases available for selected longitudinal analyses

	Number Persons (all ages)	Number of Personal Interviews
Wave 1-2	179,464	132,220
Wave 2-3	187,573	139,594
Wave 1,2,3,4,5,6,7	99,516	70,966
Wave 1,2,3,4,5,6,7,8	92,350	65,622

¹ Note that the figures include both the ECHP and national samples for Germany and the UK (1994-96) and Luxembourg (1995-96).

4. Weights

In the ECHP UDB files, weights are available for households and persons. These weights are calculated taking into account the sample design and characteristics of persons and households. The weights are calibrated to reflect the structure of the population.

The purpose of this section is to describe briefly the various weights and their appropriate use. For a detailed description of the weighting procedures that have been implemented for calculating weights in the ECHP, see PAN 165.

Table 3 describes the weights provided for each wave and file. There are two types of weights: the *base weight* (at individual level only) which would be used for longitudinal analysis and the *cross-sectional weight* (at both individual and household level) for use in cross-sectional analyses.

The base weight is available only for 'sample persons'. In Wave 1 all persons in interviewed households are considered as 'sample persons' – eligible to be followed from one wave of the panel to the next.² In the following waves, new entrants to existing households are defined as 'non-sample persons' to distinguish them from those present in the first wave. These new sample members have a zero base weight, but a non-zero cross-sectional weight.

Table 5: Weights available in the ECHP UDB

File type	Name of the weight variable	
	Base weight	Cross-sectional weight
Register	RG003	RG002
Personal	PG003	PG002
Household	-	HG004

² Under ECHP tracing rules, if a household does not contain any 'sample persons' (for example, they moved out or died), the household is dropped from the panel.

Register file

Two sets of weights are in the dataset, the base weight and the cross sectional weight. Children, as well as adults, have a cross-sectional weight and a base weight on the Register file.

Base weight (RGOO3) In Wave 1, all 'sample persons' (including children) receive a non-zero base weight and all persons in the same household share the same weight.

From Wave 2 and onwards the base weights are computed on the basis of the Wave 1 base weights, modified to take into account attrition between the waves and calibration of the achieved sample to external control distributions by basic personal and household characteristics. New members (joining the household after Wave 1) do not have a base weight assigned.

Cross-sectional weight (RGOO2)

In Wave 1 the cross-sectional weights are identical to the base weights and are equal for all household members.

From Wave 2 and onward households members have the same cross-sectional weight that is computed as the *average* of the base weights of all household members.

Personal file

As for the register file, base weights and cross sectional weights are available in the dataset.

Base weight (PGOO3)

All 'sample persons' who complete a personal interview (and have a record in the Personal File) receive a non-zero base weight and 'non-sample persons' receive a zero base weight. The personal file base weight is derived from the register file base weight and is adjusted to take account of variations in response rates on the Personal Questionnaire by age, gender and other personal characteristics. Therefore, unlike the register file base weight, the personal file base weight will differ between household members.

From Wave 2 and onwards the same applies, that is, 'sample persons' receive a non-zero base weight and 'non-sample' persons receive a zero base weight.

Cross-sectional weight (PG002)

In Wave 1 the cross-sectional weight is identical to the base weight.

From Wave 2 and onward households members have the same cross-sectional weight that is computed as the average of the base weights of the *interviewed* household members.

Household file

In the household file across all waves there is only one weight: the cross-sectional weight. By definition, the base weight cannot apply to households, as households are not stable in composition across time.

Population scaling

The weights in the household and personal file (as well as the register file) have been rescaled so that the mean of the weight within country is equal to one. For the purpose of some analysis one might wish to scale results to population size and to do so we can use a grossing factor. This grossing factor is constructed as the ratio of two components, N/n . The numerator (N) is the population size analysed - that is the country total population (persons for the register file, households for the household file) or the population aged 16 and over (for the personal file). The denominator (n) is the sample size of the population analysed, that is, the number of cases in the register, household or personal file, as appropriate. Information on total population sizes (persons, households, persons age 16 and over) can be found in the country file for each wave.

Longitudinal analysis, cross-sectional analysis and appropriate weight

By definition with longitudinal analysis we are only concerned with persons present in a number of consecutive waves that would require the use of a specific weight. Eurostat does not supply in the ECHP dataset such a longitudinal weight for each subset of waves that might be analysed. However the base weight (RG003 or PG003) is available for 'sample persons' who were present in the panel in earlier waves. The appropriate weight to use for longitudinal analysis, then, is the base weight of the last wave analysed. So,

for instance, to analyse employment information from the personal questionnaires for 1994-1999, PG003 from 1999 would be used.

On the other hand, if the analyst is interested in using the data for cross-sectional purposes, the cross-sectional weight should be used. This weight is available for all persons present (and personally interviewed, in the case of PG002) in that wave: both sample persons and non-sample persons.

5. After the ECHP: EU-SILC

As mentioned earlier, the ECHP ran from 1994 to 2001. From 2004 onwards a new instrument called EU-SILC (Statistics on Income and Living Conditions) will replace it as the central source of micro-data on household incomes and social exclusion in the EU. EU-SILC will be organised under a framework Regulation adopted in 2003 by both the EU Council of Ministers and the European Parliament. Unlike the ECHP, it will therefore be compulsory for all Member States. Among the EU-15 Member States, 6 have launched EU-SILC as from 2003 on the basis of informal agreements signed with the Commission (Belgium, Denmark, Greece, Ireland, Luxembourg and Austria). Apart from Germany, the Netherlands and the UK, the other Member States will start in 2004 as foreseen in the Regulation; Germany, the Netherlands and the UK will start in 2005. Depending on the country, accession and candidate countries will launch EU-SILC between 2004 and 2007.

The priority with EU-SILC is the provision of quality, timely *cross-sectional* information on household incomes and social exclusion. The emphasis is on output harmonisation rather than input harmonisation: the data may come from different sources in different EU member states, and countries with highly developed population registers will be encouraged to use these sources. Notwithstanding the efforts at output harmonisation, (which are formalised in a series of Commission's Regulation to be approved by the Director-generals of national statistical institutes) the international comparability of data from EU-SILC will inevitably be diminished compared to the ECHP. EU-SILC is also more limited in content than the ECHP. The main differences between the ECHP and SILC are:

- Whereas the ECHP was a full panel (with all sample persons from wave 1 followed for the life of the panel) EU-SILC will allow for a rotational design in which an individual is followed for four years. Countries seeking to conduct a full panel will, however, be allowed to do so.
- The ECHP was based on the use of harmonised questionnaires in all the participating member states (at least in the first three waves), but SILC allows key data on individuals to be drawn from registers or other sources where these are available in a country. This is done to ensure that each country can use what it considers to be its ‘best source(s)’ for income data, but reduces the degree to which the methodology is harmonised across countries.
- Much of the detailed information on labour market situation and on non-monetary indicators of exclusion has been dropped from SILC.
- EU-SILC allows certain income components to be provided only at the household level: family allowances (including Child Benefit and Lone Parent Allowance), property income (interest, dividends, rent), housing allowances (such as rent and mortgage interest supplements) and social assistance payments. In contrast, apart from social assistance and housing benefits, the ECHP recorded these at the level of the individual recipient. This means that SILC will lack the kind of data needed for tax-benefit modelling at the level of the individual or tax unit.

6. Further Information

As noted earlier, Eurostat has produced a large number of detailed documents on the ECHP, ranging from the ‘blueprint’ ECHP questionnaires, through documents dealing with methodological issues, to the agenda and minutes of ECHP meetings. These are available on the CIRCA website³ and a list of the documents is provided in Annex A.

³ <http://forum.europa.eu.int/Public/irc/dsis/echpanel/home>

Apart from this User Guide, the Euro-Panel User Network ([EPUNet](#)) has a number of other resources that are likely to be of interest to new and advanced users of the ECHP. The resources include the following:

- [Set-up programmes](#) for use in converting the Comma Separated Variable (CSV) files issued by Eurostat into formats for analysis in the statistical packages SPSS, SAS and STATA.
- A searchable register of “[Queries and Solutions](#)” based on the experience of ECHP Users. This register includes problems and issues arising in the course of work on the ECHP and, where available, the solutions that have been proposed.
- An [e-mail hotline](#) for queries not covered in the Register of Queries and Solutions.
- [Training courses](#) for new and advanced users of the ECHP.
- [Examples of SPSS syntax](#) for linking and matching files, from the EPUNet training courses.
- [Research Visits](#) where researchers from institutions who do not already have access to the ECHP can come for a period of several weeks and use the ECHP data for a specific research project.
- A database of programs for computing [derived variables](#) which have been used in previous research using the ECHP.
- A [database of research projects](#), working papers and publications based on the ECHP.
- An [annual conference](#) focusing on comparative research using the ECHP.

We hope that you have found this guide helpful. We would be glad to receive comments [dorothy.watson@esri.ie]. We also hope that you will also consider contributing your own queries, solutions, programs for computing derived variables and research papers to EPUNet – this can be done from the [website](#). EPUNet is a network *of* ECHP users *for* ECHP users and its success depends on your participation.

Annex B VARIABLE NAMES AND LABELS

Household file variables

HG-General information

WAVE	Wave number
COUNTRY	Country code
HID	Household identification number
HG001	Personal identification number of the reference person
HG002	Personal identification number of person responsible for accommodation
HG003	Personal identification number of respondent to household interview
HG004	Household cross-sectional weight
HG005	Primary strata, as used in the selection of original sample area (anon.)
HG006	Primary sampling unit (PSU) code (anonymised)
HG007	The order of selecting the PSUs, if systematic sampling (anonymised)
HG010	Number of visits to the household
HG011	Number of minutes used to complete the household questionnaire
HG012	Day of the interview for the household questionnaire
HG013	Month of the interview for the household questionnaire
HG014	Year of interview for the household questionnaire
HG015	Region in which the household is presently situated (NUTS aggregates)

HD-Demographic information

HD001	Household size (total number of household members at present)
HD002	Number of adults in the household (16 years or more)
HD002A	Number of personal interviews completed
HD003	Number of adults in the household (14 years or more)
HD004	Equivalent size, OECD scale
HD005	Equivalent size, modified-OECD scale
HD006	Household type (sociological typology)
HD006A	Household type (economic typology)
HD006B	Household type (economic typology focused on persons aged 65 or more)
HD007	Number of members moved out
HD008	Number of members died
HD009	Number of members moved in
HD010	Number of members born
HD011	Number of members omitted in last wave (by mistake)
HD012	Number of interviewed household members at work
HD013	Number of interviewed economically active household member

HI-Income

HI100	Total net household income (detailed, NC, total year prior to the survey)
HI100X	Total household net income imputation index (0-1)
HI110	Total net income from work (net, NC, total year prior to the survey)
HI111	Wage and salary earnings
HI111X	Wage and salary earnings imputation index (0-1)
HI1111	Wage and salary earnings (regular)
HI1112	Wage and salary earnings (lump sum)
HI112	Self-employment earnings (net)
HI112X	Self-employment earnings imputation index (0-1)
HI120	Non-work private income (net, NC, total year prior to the survey)
HI121	Capital income
HI121X	Capital income imputation index (0-1)
HI122	Property/rental income
HI122X	Property / rental income imputation index (0-1)
HI122G	Property/rental income, gross, year prior to the survey
HI123	Private transfers received
HI123X	Private transfers received imputation index (0-1)
HI130	Total social transfer receipts (net, NC, total year prior to the survey)
HI131	Unemployment related benefits
HI131X	Unemployment related benefits imputation index (0-1)
HI132	Old-age/survivors' benefits
HI132X	Old-age/survivors' benefits imputation index (0-1)
HI133	Family-related allowances
HI133X	Family-related allowances imputation index (0-1)
HI134	Sickness/invalidity benefits
HI134X	Sickness/invalidity benefits imputation index (0-1)
HI135	Education-related allowances
HI135X	Education-related allowances imputation index (0-1)
HI136	Any other (personal) benefits
HI136X	Any other (personal) benefits imputation index (0-1)
HI137	Social assistance
HI137X	Social assistance imputation index (0-1)
HI138	Housing allowance
HI138X	Housing allowance imputation index (0-1)
HI140	Adjusting household income for within household non-response
HI200	Current total monthly net household income (summary question, NC, year of the survey)
HI211M	Current wage and salary earnings - net (monthly, NC, year of the survey)
HI211X	Current wage and salary earnings - net - imputation index
HI211MG	Current wage and salary earnings - gross (monthly, NC, year of the survey)
HI211XG	Current wage and salary earnings - gross - imputation index

HF-Financial situation

HF001	Repay debts other than mortgage
HF002	Ability to make ends meet
HF003	Can the household afford keeping its home adequately warm?
HF004	Can the household afford paying for a week's annual holiday away from home?
HF005	Can the household afford replacing any worn-out furniture?
HF006	Can the household afford buying new, rather than second-hand, clothes?
HF007	Can the household afford eating meat, chicken or fish every second day, if wanted?
HF008	Can the household afford having friends or family for drink or meal at least once a month?
HF009	Has the household been unable to pay scheduled rent for the accommodation during the past 12 months?
HF010	Has the household been unable to pay scheduled mortgage payments during the past 12 months?
HF011	Has the household been unable to pay scheduled utility bills, such as electricity, water, gas during the past 12 months?
HF012	Has the household been unable to pay hire purchase instalments or other loan repayments during the past 12 months?
HF013	Is there normally some money left to save (considering household's income and expenses)
HF014	Lowest monthly income to make ends meet (in NC)
HF015	Income situation compared to last year
HF016A	Household received non-cash assistance
HF016B	Number of months the household received non-cash assistance
HF017	Inherit, receive gift or lottery winnings worth 2000 EURO or more
HF018	Amount of the inheritance, gift or lottery winnings
HF018A	Significant savings (1000 Ecu or more) from consuming food from own agriculture or gardening
HF019	Significant savings (1000 Ecu or more) from consuming other goods from own business
HF020	Significant savings (1000 Ecu or more) from home production, repairs and maintenance, i.e. all kinds of do-it-yourself activities
HF021	General feeling about present economic situation

HA-Accommodation

HA001	Year of move to this address
HA002	Month of move to this address
HA003	Move from (geography)
HA004	Reason for move
HA005	Kind of accommodation
HA006	Number of rooms without kitchen (maximum value=9+)
HA006A	Number of rooms without kitchen (maximum value=6+)
HA007	Number of rooms including kitchen (maximum value=10+)
HA007A	Number of rooms including kitchen (maximum value=7+)
HA008	Does the dwelling have separate kitchen?
HA009	Does the dwelling have bath or shower?
HA010	Does the dwelling have indoor flushing toilet?
HA011	Does the dwelling have hot running water?
HA012	Does the dwelling have heating or electric storage heaters ?
HA013	Does the dwelling have a place to sit outside, e.g. terrace or garden ?
HA014	Does the accommodation have shortage of space ?
HA015	Does the accommodation have noise from neighbours or outside ?
HA015A	Does the accommodation have noise from neighbours ?
HA015B	Does the accommodation have other noise from outside (traffic, businesses, factories, etc.?)
HA016	Is the accommodation too dark / not enough light ?
HA017	Does the accommodation have lack of adequate heating facilities ?
HA018	Does the accommodation have leaky roof ?
HA019	Does the accommodation have damp walls, floors, foundations etc. ?
HA020	Does the accommodation have rot in window frames or floors ?
HA021	Is there any pollution, grime or other environmental problem caused by traffic or industry ?
HA022	Is there crime or vandalism in the area ?
HA023	Tenure status
HA024A	Existence of outstanding loan or mortgage for the accommodation
HA024B	Monthly amount to pay for outstanding loan or mortgage for the accommodation (in NC)
HA025	Amount of monthly repay for outstanding loan or mortgage is gross or net after tax relief
HA026	From whom is the accommodation rented ?
HA027	Monthly rent, gross
HA029	Pay repairs and maintenance in addition to rent

- HA030 Pay heating in addition to rent
- HA031 Pay other electricity or gas in addition to rent
- HA032 Pay water in addition to rent
- HA033 Pay sewage removal in addition to rent
- HA034 Pay garbage removal in addition to rent
- HA035 Pay other services or municipal charges in addition to rent
- HA036 Are housing costs a financial burden ?

HB-Durables

- HB001 Possession of a car or van (for private use)
- HB002 Possession of colour TV
- HB003 Possession of a video recorder
- HB004 Possession of a micro wave
- HB005 Possession of a dishwasher
- HB006 Possession of a telephone
- HB007 Possession of a second home (e.g. for vacation)
- HB008 Possession of a home computer

HL-Children

- HL001 Children under 12 in the household
- HL002 Children looked after on a regular basis
- HL003 Pay for the children looked after
- HL004 Children between 12 and 15 in the household
- HL005 Has any of the children under 16 an independent source of income ?

Personal file variables

PG-General information

WAVE	Wave number
COUNTRY	Country code
HID	Household identification number
PID	Personal identification number
PG001	Basic household identification number
PG002	Personal weight (cross-sectional)
PG003	Base weight
PG004	Number of minutes to complete the individual questionnaire
PG005	Day of the personal interview
PG006	Month of the personal interview
PG007	Year of the personal interview
PG008	Mode of interviewing

PD - Demographic information

PD001	Year of birth
PD003	Age
PD004	Sex
PD005	Present marital status
PD006	Date of last change in marital status
PD007	Person is living in consensual union
PD008	Cohabitation status

PE - Employment

PE001	Main activity status - self-defined
PE001A	Main activity status - self-defined (a)
PE002	Main activity status - self-defined (regrouped)
PE002A	Main activity status - self-defined (regrouped) (A)
PE003	ILO main activity status at the time of interview PEO04 Status in employment
PE004	Status in employment
PE005	Total number of hours working per week (in main + additional jobs)
PE005A	How many hours (including paid overtime) do you work in your main job or business?
PE005B	Main reason for working less than full time (less than 30 hours) in main job

- PE005C Main job: Full-time / part time
- PE006A Occupation in current job, i.e. principal activity performed (grouped A)
- PE006B Occupation in current job, i.e. principal activity performed (grouped B)
- PE006C Occupation in current job, i.e. principal activity performed (grouped C)
- PE007 A Main activity of the local unit of the business or organisation in current job (Grouped A)
- PE007B Main activity of the local unit of the business or organisation in current job (Grouped B)
- PE007C Main activity of the local unit of the business or organisation in current job (Grouped C)
- PE008 Number of regular paid employees in the local unit in current job
- PE009 Current job in private or public sector?
- PE010 Job status - current job (persons in paid employment as main activity)
- PE011 Year of start of current job
- PE012 Month of start of current job
- PE013 By what means were you first informed about your present job ?
- PE014 Existence of an unemployment period before current job
- PE015 Number of months of continuous unemployment before current job
- PE016 Do you feel that you have skills or qualifications to do a more demanding job than the one you have now?
- PE017 Does your work involve the use of a language other than [the official language of the country] ?
- PE018 First foreign language used in current job 22
- PE019 Second foreign language used in current job
- PE020 Third foreign language used in current job
- PE021 Have you had formal training or education that has given you skills needed for your present type of work?
- PE022 How much has this training or education contributed to your present work?
- PE003 How are you paid for your apprenticeship or training? Do you receive a wage from your employer, or do you receive a social security benefit or retraining allowance?
- PE024 What type of employment contract do you have in your main job?
- PE025 What is the total length of this contract?
- PE026 Child-minding or crèche provided by employer (free or subsidised)
- PE027 Health care or medical insurance provided by employer (free or subsidised)
- PE028 Education or training provided by employer (free or subsidised)
- PE029 Sports and leisure, holiday centre provided by employer (free or subsidised)

- PE030 Housing provided by employer (free or subsidised)
- PE031 How satisfied are you with your present job in terms of earnings?
- PE032 How satisfied are you with your present job in terms of job security?
- PE033 How satisfied are you with your present job in terms of type of work?
- PE034 How satisfied are you with your present job in terms of number of working hours?
- PE035 How satisfied are you with your present job in terms of working times (day time, night time, shifts etc.)?
- PE036 How satisfied are you with your present job in terms of working conditions / environment?
- PE037 How satisfied are you with your present job in terms of distance to job / commuting?
- PE038 Please think of the last 4 working weeks, not counting holiday weeks. How many days were you absent from work because of illness or other reasons?
- PE039 How old were you when you began your working life, that is, started your first job or business?

PU - Unemployment

- PU001 Person has ever been unemployed for 1 month or longer before first job or business
- PU002 Person has been unemployed during the five years before joining the survey
- PU002A Person has been unemployed after 1989
- PU003 Number of times the person has been unemployed during the five years before joining the survey
- PU003A Number of times the person has been unemployed after 1989
- PU004 Is one of the unemployment spells (during the five years before joining the survey) longer than one year
- PU004A Is one of the unemployment spells (since 1989) longer than one year

PS - Search for work

- PS00I Looking for job
- PS00IA Main reason for not seeking work
- PS002 Assuming you could find suitable work, how many hours per week would you prefer to work in this new job ?
- PS003 How good or bad do you think are your chances of finding the kind of job you are looking for within the next 12 months?
- PS004 In the past four weeks, have you contacted a public employment office about finding work?

- PS005 In the past four weeks, have you taken active steps to find a job?
- PS006 What is the main reason you have not taken any steps to find work in the past four weeks?
- PS007 Minimum net monthly income (in NC) the person would accept to work the number of hours indicated in PS002
- PS008 If a suitable job was available now, would you be able to start within the next 2 weeks?
- PS009 Do you receive at present any unemployment benefit or assistance?
- PS010 Are you registered at a public employment office for work?
- PS011 Have you received any job offer during past 4 weeks?
- PS012 Have you accepted any of the job offers you received during the past 4 weeks?
- PS013 When do you expect to start the new job?
- PS014 What is the main reason you have not accepted the most recent job offer?
- PS015 For how long have you been seeking work, whether replacing or additional to your present work?

PJ - previous Job

- PJ001 Person has worked before(*)
- PJ002 Year stop working in last job
- PJ003 Month stop working in last job
- PJ004 Reason for stopping in previous job
- PJ005 If you compare your present job or business with your previous one, is the present one all in all.?
- PJ006 Status in employment (previous job)
- PJ007A Occupation in previous job, i.e. principal activity performed (Grouped A)
- PJ007B Occupation in previous job, i.e. principal activity performed (Grouped B)
- PJ007C Occupation in previous job, i.e. principal activity performed (Grouped C)
- PJ008A Main activity of the local unit of the business or organisation in previous job (Grouped A)
- PJ008B Main activity of the local unit of the business or organisation in previous job (Grouped B)
- PJ008C Main activity of the local unit of the business or organisation in previous job (Grouped C)
- PJ009 Number of regular paid employees in the local unit in previous job
- PJ010 Previous job in public / private sector
- PJ011 Job status - previous job
- PJ012 Previous job: Full time / part time

PC - Calendar of activities

- PC001 Main activity status in January last year

PC002 Main activity status in February last year
 PC003 Main activity status in March last year
 PC004 Main activity status in April last year
 PC005 Main activity status in May last year
 PC006 Main activity status in June last year
 PC008 Main activity status in August last year
 PC009 Main activity status in September last year
 PC010 Main activity status in October last year
 PC011 Main activity status in November last year
 PC012 Main activity status in December last year
 PC013 Most frequent activity, last year

PI - Income

PI001 Main source of personal income
 PI010 Within-household non-response inflation factor
 PII00 Total net personal income (detailed, NC, total year prior to the survey)
 PI110 Total net income from work (net, NC, total year prior to the survey)
 PI1111 Wage and salary earnings (net, NC, total year prior to the survey)
 PI1111 Wage and salary earnings (regular)
 PI1112 Wage and salary earnings (lump sum)
 PI112 Self-employment income (net)
 PI121 Capital income
 PI122A Assigned property/rental income
 PI123 Private transfers received
 PI130 Total social/social insurance receipts (net, NC, year prior to the survey)
 PI131 Unemployment related benefits
 PI132 Old-age / survivors' benefits
 PI1321 Old-age related benefits
 PI1322 Survivors' benefits
 PI133 Family-related allowances
 PI134 Sickness/invalidity benefits
 PI135 Education-related allowances
 PI136 Any other (personal) benefits
 PI137A Assigned social assistance
 PI138A Assigned housing allowance
 PI211M Current wage and salary earnings - net (monthly)
 PI211MG Current wage and salary earnings - gross (monthly)

PT - Training and education

- PT001 Have you been in education or training since January last year?
- PT002 Which kind of course (s) was it?
- PT003 Starting year of the general education course
- PT004 Starting month of the general education course
- PT005 Finishing year of the general education course
- PT006 Finishing month of the general education course
- PT007 Level of the general education course
- PT007A Level of the general education course (aggregated)
- PT008 Starting year of the vocational education course
- PT009 Starting month of the vocational education course
- PT010 Finishing year of the vocational education course
- PT011 Finishing month of the vocational education course
- PT012 Type of the vocational education course
- PT013 Overall duration of the vocational education course
- PT014 Number of days of the vocational education course 25
- PT015 Number of weeks of the vocational education course
- PT016 Number of months of the vocational education course
- PT017 Was the vocational education course paid for or organised by the employer
- PT018 Was the vocational education course a full-time, a part-time attendance course or a course by correspondence
- PT019 Number of hours per week if the vocational education course was a part-time attendance course
- PT020 Was improving your skills or job prospects one of the reasons you took this vocational education or training course?
- PT021 Was this vocational education or training course useful for improving your skills or job prospects?
- PT022 Highest level of general or higher education completed
- PT023 Age when the highest level of general or higher education was completed
- PT024 Age when full time education was stopped

PH-Health

- PH001 How is your health in general?
- PH002 Do you have any chronic physical or mental health problem, illness or disability ?
- PH003 Are you hampered in your daily activities by ~ physical or mental health problem, illness or disability? (only for persons with a

- PH003A Are you hampered in your daily activities by any physical or mental health problem, illness or disability? (all persons)
- PH004 During the past two weeks, have you had to cut down things you usually
- PH005 During the past two weeks, have you had to cut down things you usually do about the house, at work or in your free time because of an emotional or mental health problem ?
- PH006 During the past 12 months, have you been admitted to a hospital as an in-patient?
- PH007 Number of nights spent in hospital during the past 12 months
- PH008 During the past 12 months, about how many times have you consulted a general practitioner (including home visits by the doctor) ?
- PH009 During the past 12 months, about how many times have you consulted a medical specialist (including out-patient consultations but excluding any consultation during hospitalisation) ?
- PH010 During the past 12 months, about how many times have you consulted a dentist?
- PH011 Number of times the person has been to a doctor or a dentist or optician, during the past 12 months.(aggregated)
- PH012 Are you entitled to free - or nearly free - medical treatment under a state financed health care system?

- PK001 Satisfaction with work or main activity
- PK002 Satisfaction with financial situation
- PK003 Satisfaction with housing situation
- PK004 Satisfaction with amount of leisure time 27

Register file variables

RG - General information

WAVE	Wave number
COUNTRY	Country code
HID	Household identification number
PID	Personal identification number
RG001	Basic household identification number
RG002	Personal weight (cross sectional)
RG003	Base weight

RD - Demographic information

RD001	Year of birth of the individual
RD002	Month of birth of the individual
RD003	Age of the individual
RD004	Sex of the individual
RD005	Working 15+ hours

Relationship file variables

WAVE	Wave number
COUNTRY	Country code
HID	Household identification number
PID1	Personal identification number of first person
RELATION	Relationship between persons (PID1 and PID2)
PID2	Personal identification number of second person

Longitudinal link file variables

Link - fixed variables

COUNTRY	Country code
PID	Personal identification number
BIRTHYY	Year of birth of the individual
BIRTHMM	Month of birth of the individual
SEX	Sex of the individual
SAMPERS	Sample person
Firstint	Wave of first completed interview

Link - wave specific variables - the person's household

HIDi	Household identification number in wave i
HSTATUSi	Sample status of the person's household in wave i
HRESIDi	Residential status of the person's household in wave i
HREGIONi	Region in which household is situated in wave i

HTRACEi	Able to trace the household in wave i
HFNRESi	Household's interview result in wave i
HSIZEi	Household size (total number of household members at present)
HMOUti	Number of Household Members moved out since last wave
HMINi	Number of household members moved in this wave
HBORNi	Number of new born children in the household
HDIEDi	Number of household members that died since last wave
Homiti	Number of household members omitted in last wave (by mistake)

Link - wave specific variables - the person

PRESIDi	Residential status in wave i
PTEMPi	Where the person is currently / temporarily living in wave i
PLASTWi	Membership status in wave i-1
PIO- YYi	Year moving in / born or out / died (wave i)
PIO_MMi	Month moving in / born or out / died (wave i)
PTRACEi	Able to trace the person in wave i
PWSTATi	Weighting status in wave i
PSAMSTAi	Sample status in wave i
PELIGi	Whether eligible for the personal interview in wave i
PINTIDi	Same interviewer as last wave
PFNRESi	Individual interview result in wave i

Country file variables

COUNTRY	Country code
